Digital instruments and measuring transducers

CIRCUTOR offers a wide range of fully programmable digital indicators and instruments that can be used to display electrical parameters or define an alarm system associated to an electrical parameter.

Definition

In digital instruments, the measurement process provides discontinuous information, expressed in a number with various digits. This is the numerical value of the parameter measured; the numerical indication is presented throughout the time scale with a predetermined frequency.

In general, digital instruments have advanced input features when compared to analogue instruments, for example, a higher input impedance in voltage circuits (greater than 2 MW), with a lower consumption of energy and higher accuracy, offering an automatic scale selection and indication of the polarity, which is stored in the instrument and this improves the reliability of the measurement process. CIRCUTOR offers three ranges of digital programmable instruments: **DC-B**, **DH-96** and **ROYAL**.

Its general features are as follows:

- Different sizes 48 x 48, 72 x 72, 96 x 96, 96 x 48 mm
- Multi-scale programmable digital instruments.
- Measurement in true root mean square (TRMS) Measurement of voltage and current with the same unit. Voltmeter, ammeter, wattmeter, varmeter, voltammeter, cos ϕ indicator, THD indicator, process indicators, process control, etc.
- Top performance features in the measurement circuit:
 - Accuracy (class 0.1; class 0.2; class 0.5), depending on the type.
 - Resolution up to 16 bits.
 - Visualization capacity (3, 4, 5 digits)
- Wide range of programmable and multi-scale digital instruments to measure AC and DC.
- Module connection options (**DH-96** family):

- Relays
- Analogue outputs (0...10 V, 4..20 mA, etc.)
- Communications with the PC (RS-232, RS-485, with protocols MODBUS RTU, ETHERNET).
- Auxiliary AC and DC power supply
- **PowerStudio** and **PowerStudio SCADA**
Software to centralise and record the values measured by the computer (equipment with communications)
- Network connection with other RS-485 instruments (**CVM** power analyzers, etc.)
- Specific instruments for the control of processes (galvanic dips, capacitor bank load analyzers, solar energy, etc.)
- Development in compliance with the current regulations.
- High protection degree (up to IP 65, with accessory)

Applications

- 1.- Display on the screen of the numerical value of one or more electrical parameters of a sub-panel, control process or determined unit.

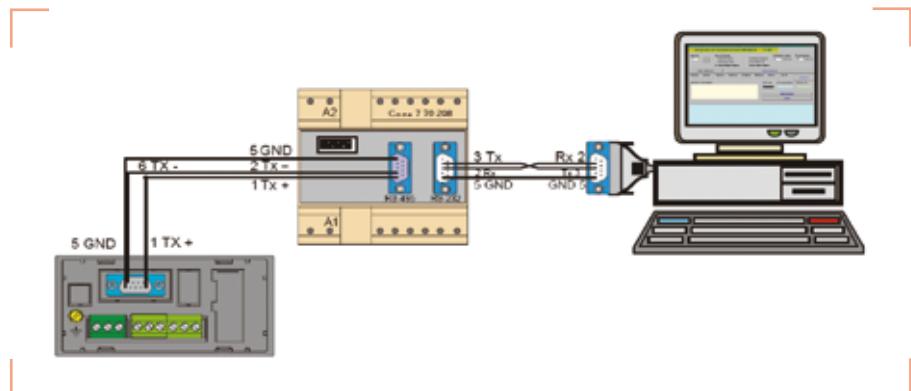

- 2.- Alarm system: acting on meters, sound and/or light devices, to carry out the protection or notification operations with a relay output .

- 3.- Control system via software:

- Voltage control
- Current control
- Frequency control
- Temperature control
- Control of any process signal
- Control of harmonics
- Time control

Product selection table

		Measurement	Page
DC-B		Single-phase A.C. or D.C.	6
DH96		Single-phase A.C. or D.C.	9
Royal		Single-phase A.C.	17
DM45		Single-phase A.C.	19
CMM 96		Three-phase A.C.	21
Narrow profile transducers		Single-phase or three-phase according to type	23
High-precision transducers		Three-phase A.C.	25

Digital instruments**DC Series**

Digital indicator for panel mounting

**Description**

- Fully programmable: scale, transformer ratio, etc.
- Measurement of V, A, Hz or °C.
- Measurement in true root mean square (TRMS), ac types.Excellent quality / price ratio
- Measurement of maximum and minimum values
- Optional relay output, depending on the type

Application

- The high luminosity 4-digit digital display indicates the voltage, current, frequency or instantaneous temperature, with the maximum and minimum values of medium and low voltage lines.

Features

Power supply circuit	115 / 230 Vac ($\pm 10\%$)
Frequency	40...70 Hz
Consumption	4 V·A
Measurement circuit	
Resolution	10 bits
Display refresh rate	1s
Accuracy	± 0.5 FE (± 1 digit)
No. of samples per cycle (AC)	32 / cycle
No. of samples per reading (DC)	64 / reading
Display	
Digits	4
Decimal place	Programmable
Range	0...9999 (ac) / -1999...9999 (dc)
Scale excess indicator	"— — —"
Insulation between the input and measurement	
Test voltage	3 kV, 50 Hz, 1 min
Impulse test	4 kV (1.2 / 50 μ s)
Ambient conditions	
Storage temperature	- 40 ... +70 °C
Operating temperature	-10 ... +65 °C
Altitude	2000 m
Build features	
Box material	ABS V0, grey anthracite
Degree of protection	Fitted unit (front panel) IP 54 (IP 65 with front panel protection)
	Box and terminals IP 20
Weight	250 g
Standards	
IEC 1010, IEC 348, IEC 664, EN 50081-1, EN 50082-1

Digital instruments**DH series**

Digital instruments for panel mounting

**Description**

- Digital unit designed to show the programmed value of an electrical variable or process signal on a display, depending on type. Also useful for regulation if used with relay output cards (alarms)
- Fully programmable: scale, transformation ratio, alarm relays, communications, etc.
- Measurement of V, A, Hz and process signal (impulses, weight, temperature, pressure, etc.).
- Measurement in true root mean square (TRMS), types in AC.
- Multitude of options with expansion modules
- 4 high luminosity digits
- High accuracy
- Installation in 96 x 48 mm panel
- 4 digit, high luminosity

Application

- The high luminosity 4-digit digital display indicates the voltage, current, frequency, etc. and it can be used to define the alarms of the different electrical parameters measured.
- Transducer display of measured parameters to analogue signal for PLCs
- Display and communication of measured data via RS-485 / RS-232 bus for integration into software or PLC.

Features

Power supply circuit	230 Vac (-15 ... +20%)
Frequency	4 V·A (without card), 7 V·A (with card)
Consumption	45...65 Hz
Measurement circuit	
Overvoltage (permanent / during 10 s)	1.2 U_n / 2 U_n
Overload (permanent / during 10 s)	1.2 I_n / 5 I_n
Measurement margin	2 .. 120 %
No. of conversions per cycle	32
Display	Seven 14 mm segments, red
Decimal place	Programmable
Scale excess indicator	"— — —"
Insulation	
Test voltage	3 kV, 50 Hz, 1 min
Impulse test	4 kV (1.2 / 50 s)
Ambient conditions	
Storage temperature	-40 ... +70 °C
Operating temperature	-10 ... +65 °C
Altitude	2000 m
Build features	
Box material	ABS V0, grey anthracite
Degree of protection	Box and terminals: IP 20 / Front panel: IP 54
Weight	550 g
Standards	
In A, C, P types: IEC 1010, IEC 348, IEC 664, VDE 0110, VDE 0435

Description

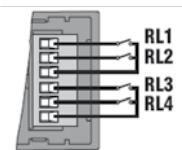

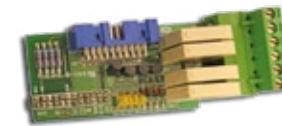

Features

Module 4 relays

Description

Features

DIN

DH series

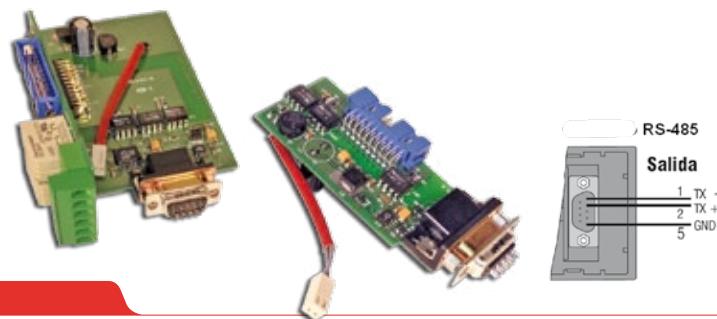

Digital instruments for panel mounting

Communications module**Description**

- 0 to 247 programmable peripherals
- Selection of peripheral number
- (only in RS-485)
- Selection of communication parameters: speed, parity and stop bits

Features

	RS-232 Module	RS-485 Module
EDS Protection	Up to 10 kVac	Up to 2 kVac
Communication lines protected against overloads, short-circuit to earth	30 V without damage	-
Protected against blockages	Yes	-
Communication lines with thermal protection against excessive power dissipation	-	Yes
Connection or disconnection from the active network	-	Yes
Standards	EIA RS-232	EIA RS-485

**Analogue output module****Description**

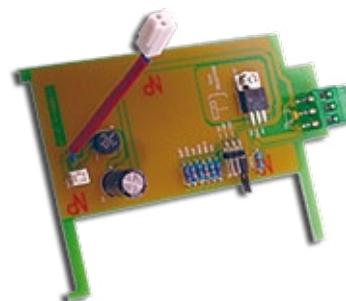

- Output option:
- 0 20 mA or 4 20 mA
- 0 10 V or 2 10 V
- Range of programmable output

Features

Resolution	14 bits
Maximum load impedance for current outputs	500
Maximum load impedance for voltage outputs	500
Insulation between analogue outputs and the power supply	3 kV
Insulation between analogue and measurement outputs	3 kV
Response time	< 100 ms
Rippling, in TRMS	< 0,5 %
Temperature coefficient	100 ppm / °C
Standards	IEC 1010, IEC 529, IEC 801, EN 50081-2, EN 5002-2

**Auxiliary power supply module (DH96P)****Description**

- Selectable auxiliary voltage: 5, 10, 15 Vdc
- Compatible with all modules
- (except for relays and communications)
- Power supply for 2 and 3 wire sensor
- 0 / 4...20 mA
- Maximum power 1 V·A

DIN

DH series

Digital instruments for panel mounting

Description

COMMUNICATIONS

Features

- 0 to 247 programmable peripherals
- Selection of instrument direction (only in RS-485)
- Selection of communication speed: 1200, 2400, 4800, 9600 and 19200 bits/s
- Selection of parity: even, odd or no parity
- Selection of stop bits: 1 or 2

COMMUNICATIONS Features

	RS-232 Module	RS-485 Module
EDS Protection	Up to 10 kV	Up to 2 kV
Communication lines protected against overloads, short-circuit to earth	30 V without damage	-
Communication lines with thermal protection against excessive power dissipation	-	Yes
Connection or disconnection from the active network	-	Yes
Fully protected against blockages	Yes	-
Standards	EIA RS-232	EIA RS-485

RELAYS

Features

- Maximum or minimum alarm connection
- Selectable delay to alarm connection and disconnection, programmable between 1 and 9 999 s
- Selectable hysteresis of between 1 and 9999 points
- Alarm interlocking option
- Option of fail-safe relay

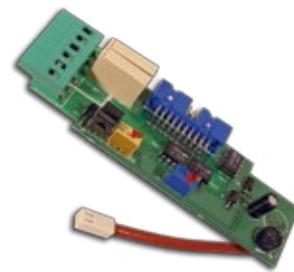

RELAY Features

	2 Relays	4 Relays
Nominal current	8 A	5A
Maximum voltage	250 Vac	
Maximum resistive load	2000 V·A	750 V·A
Insulation resistance (at 500 Vdc)	> 1000Ω	Yes
Contact - coil insulation	4 kV	2 kV
Contact - contact insulation: 2/4 relays	1 kV	750 Vac
Mechanical working life (No. of operations)	10^7	20×10^6
Electrical working life (8 A and 250 V) (No. of operations)	$> 10^5$	$> 30 \times 10^4$
Standards	VDE 0435, VDE 0700, VDE 0110, VDE 0106	UL 508, C22.2 no. 14, VDE 0435

Digital indicator

Royal series

Digital indicator of various parameters for panel or DIN rail mounting

**Description**

- 4 digits, high luminosity
- Measurement in true root mean square (TRMS)
- Measurement in 2 or 4 quadrants (power generated and consumed)
- Valid for single and three-phase systems
- 2 built-in relay outputs
- Measurement of maximum and minimum values
- Fully programmable

Application

- Ideal for industrial environments, thanks to its compact and robust format
- Optional fail-safe operation

Features

	ROYAL A4	ROYAL A4-P	ROYAL A3

Digital instruments**DM45 Series**

Digital indicator for DIN rail mounting

**Description**

- Electrical parameter indicator equipment
- Its design enables the installation of the unit on small panels
- It measures voltage, current, frequency and harmonic distortion, depending on the type
- Fully sealed
- Fully programmable alarm relay
- Robust and compact
- Stores maximum and minimum values

Application

- Displays one or various electrical parameters of a sub-panel, control process or determined machine
- Alarm system: the unit's internal relay can act on contactors, sound and/or light devices to carry out a protection or warning operation.

Features

CMM 96

Digital three-phase measurement station for panel mounting

Description

- Measures V, A, Hz and unbalances per phase
- Measurement in true root mean square (TRMS)
- Optional expansion of its functions with expansion modules:
 - 4 fully programmable relays
 - Programmable output range

Application

- Ideal for unbalanced 3 or 4 wire three-phase networks for the analysis of electrical parameters.
- Time control with the timer function, (type CH)
- Control of the maximum demand, thanks to the maximeters available per phase (type MD)

Features

Power supply circuit	
Power supply	230 Vac (-10 ... +15 %)
Frequency	35 ... 450 Hz
Consumption	5 V·A
Measurement circuit	
Scope	400 V F-N, 565 V P-P ... / 5 A
Accuracy	0.5 % (\pm 2 dig)
Overload (permanent)	1.2 I_n
Consumption	0.6 V·A
Frequency	35 ... 450 Hz
Display	
Display	Three 4-digit lines
Colour	Red, high efficiency
Display refresh rate	1 s
Ambient conditions	
Storage temperature	- 40 ... +70 °C
Operating temperature	- 10 ... +65 °C
Build features	
Box material	Self-extinguishing ABS
Degree of protection	IP 54 front panel
Size	96 x 96 x 87 mm
Weight	350 g
Standards	
IEC 1010, IEC 348, IEC 664, EN 50081-1, EN 50082-1

					Insulated - ITF	1		

Dimensions**Connections**

Converters**Narrow profile transducers**

Electrical parameter transducer in a process signal

**Description**

- Convert voltage, current or frequency in a single-phase system
- Very competitive quality / price ratio
- Ideal for small installations
- Very reliable and robust devices
- Valid for work under demanding conditions

Application

- Systems for the conversion of the electrical parameters of single-phase networks in industrial environments where there are demanding conditions and there is a reduced space.
- Converts voltage, current or frequency into a single-phase system in analogue output or process signal.
- Conversion of electrical parameter signal to process signal for PLCs.

Features

	CVE-A	CCE	CFE
Power supply circuit	230 Vac (-15 ... +20 %) (*1)		
Frequency	40 ... 90 Hz		
Consumption	2.5 V·A		
Measurement circuit			
Consumption	< 0.2 V·A		
Frequency	45 ... 65 Hz		
Nominal voltage (U_n)	0..0.690 Vac	-	10..0.600 Vac
Nominal current (I_n)	-	5 A ac	-
Measurement range	5-120 % (*2)		
Overload (permanent)	-	300 % I_n	-
Oversupply	1000 V	-	1000 V
Analogue output circuit			
Voltage load impedance	> 500		
Current load impedance	< 500		
Response time	< 300 ms		
Rippling, in TRMS	< 0,5 %		
Insulation			
Test voltage	3 kV		
Impulse test	4 kV		
Ambient conditions			
Storage temperature	-40 ... +70 °C		
Operating temperature	-10 ... +55 °C		
Altitude	2000 m		
Build features			
Box material	ABS V0		
Degree of protection	Box: IP 20 / Front panel: IP 54		
Weight (g)	190	250	190
Standards	IEC 529, IEC 688, IEC 801, EN 50081-1, EN 50082-1		

(*1) For other types of power supply, see the coding table

(*2) CVE-A-AP i CFE-AP: Measurement range 70-110 %

Narrow profile transducers

Converter of electrical parameters into process signals

References

Standard auxiliary power supply: 230 Vac, 45...65 Hz (*)

For non-standard purchase orders, please state the following: 1.Code, 2.Input range, 3.Output range, 4.Auxiliary power supply, 5. In **CFE-AP**, state the network voltage. (See coding table)

Application	Measurement	Accuracy	Input (*)	Output (*)	Type	Code
Voltmeter	AC	0.5 % FE	300 V	4...20mA	CVE-A	M25011
Voltmeter (*1)			230 V	0...20mA	CVE-A-AP	M25021
Ammeter			5 A	4...20mA	CCE-A	M25111
Ammeter (*1)				0...20mA	CCE-A-AP	M25121
Frequency-meter			45...0.55 Hz	4...20mA	CFE	M25511
Frequency-meter (Self-powered)				0...20mA	CFE-AP	M25521

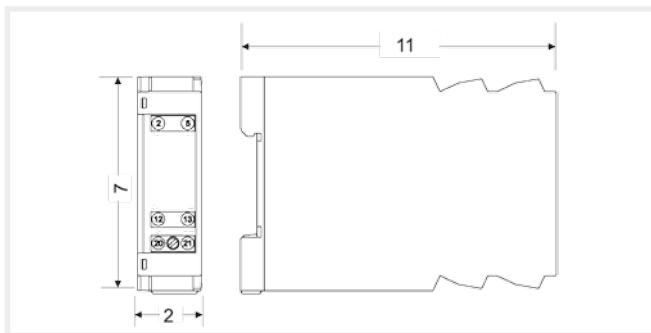

(*1) Self-powered: does not need an auxiliary power supply.

(*) Other inputs, outputs and auxiliary power supplies are offered as an option (See coding table).

High-precision

High-precision transducers

Converter of electrical parameters
into process signals

Description

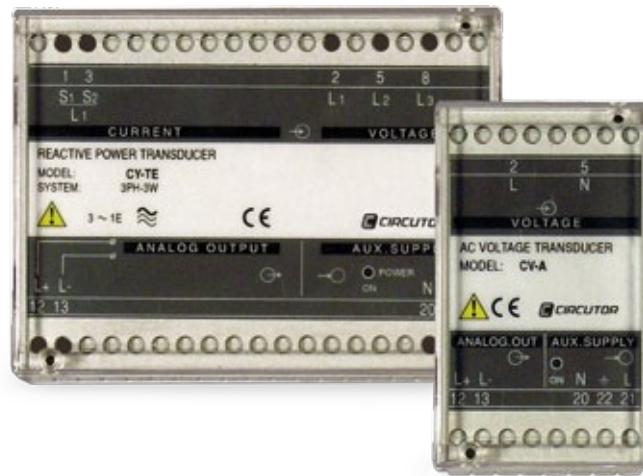

- Wide range of models to measure the main parameters of the electrical network.
- Very reliable and robust devices
- Valid for work under demanding conditions

Applications

- Systems for the conversion of the electrical parameters of single and three-phase networks in industrial environments where there are demanding conditions
- Conversion of electrical parameters to process signal for PLC or displays.

		± 0.2 % reading		0...20 mA	CC-A-RMS	M25151
		± 0.2 % reading		4...20 mA	CC-A-RMS	M25152

(*1) Self-powered: does not need an auxiliary power supply

CV-D. DC Voltage transducer

Standard auxiliary power supply: 230 Vac, 40...90 Hz

For non-standard purchase orders, please state the following:

1. Code, 2. Input range, 3. Output range, 4. Auxiliary power supply (see coding table)

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
DC Voltage	DC	± 0.2 % reading	10 mV...500 V	0...20 mA	CV-D	M25061
		± 0.2 % reading		4...20 mA	CV-D	M25062

Converters**High-precision
transducers**

Transducer of electrical parameters
into process signals

**References****CC-D. Direct current transducer**

Standard auxiliary power supply: 230 Vac, 40...90 Hz

For non-standard purchase orders, please state the following:

1. Code, 2. Input range, 3. Output range, 4. Auxiliary power supply (see coding table)

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
DC Voltage	DC	± 0.2 % reading	500 µA	0...20 mA	CC-D	M25161
		± 0.2 % reading	... 10 A	4...20 mA	CC-D	M25162

CC-WG. Leakage current transducer

Standard auxiliary power supply: 230 Vac, 40...90 Hz

For non-standard purchase orders, please state the following:

1. Code, 2. Input range, 3. Output range, 4. Auxiliary power supply (see coding table)

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
Leakage current	AC	± 0.2 % reading	0..0.3 Aac	4...20 mA	CC-WG	M25631

C-F. Frequency transducer

Standard auxiliary power supply: 230 Vac, 40...90 Hz

For non-standard purchase orders, please state the following:

1. Code, 2. Input range, 3. Output range, 4. Auxiliary power supply (see coding table)

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
Frequency	AC	± 0.2 % reading	40..0.690 V	0...20 mA	CF	M25531
		± 0.2 % reading	0...20 kHz	4...20 mA	CF	M25532

CC-G. Galvanic insulation transducer

Standard auxiliary power supply: 230 Vac, 40...90 Hz

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
Insulation galvanic	-	± 0.2 % reading	0...20 mA	0...20 mA	CC-G	M25610

CT-PT100. Temperature transducer

Standard auxiliary power supply: 230 Vac, 40...90 Hz

For non-standard purchase orders, please state the following:

1. Code, 2. Input range, 3. Output range, 4. Auxiliary power supply (see coding table)

Type of input	Measurement	Accuracy	Input	Digital	Type	Code
Temperature	-	± 0.2 % reading	Depending on the sensor	0...20 mA	CT-PT100	M25651
		± 0.2 % reading		4...20 mA	CT-PT100	M25652
